Build a Better Lawn

with

Scott's®
TURF BUILDER

Grass loves it! Feed your lawn to extra beauty and healthy growth the economical, effortless way with this nourishing grass food.

12½ lbs. feeds 2,500 sq. ft.....	1.95
55 lbs. feeds 11,000 sq. ft.....	7.50

**New, enriched blend
for greener, more vigorous growth**

PEAT · MOSS · PLUS

The Fertilized Peat

SOIL CONDITIONING

Contains Whale Soluble Concentrates, chemical plant foods and other organic materials ideal for lawn and garden beds.

QUICK-ACTING AND LONG-LASTING

Peat moss base holds up to 18 times its own weight in moisture, retaining longer these chemical foods which are quickly assimilated by all growing plants.

SUMMER, 1955

NUMBER 2

INTRODUCTION

The ARBORETUM BULLETIN has been published quarterly by the Foundation since March 1942 (omitting June 1942 and Dec. 1942) in format very similar to the present, using since the Spring 1947 issue a glossy cover of which the color denotes the season—green for spring, blue in summer, brown for fall, and red in winter. An index has been included in the last (winter) issue of each volume.

However, readers of any similar publication know very well how difficult it is to find later any particular article wanted for reference, unless note is made of it at the time and kept in some permanent form such as an indexed book or card file, and not everyone feels inclined to thumb through a large number of copies in order to locate an article in an unknown past year.

So for this and other reasons the Editorial Board decided last year to assemble a comprehensive index to cover all the issues from March 1942 through Winter 1954 and to publish it as the regular summer issue for 1955, feeling that the desirability of having all our articles listed under one cover would outweigh the possible disadvantages of devoting an entire issue to it.

The index is divided into two principal sections, authors and subjects, both arranged alphabetically. In the latter only, illustrations are indicated by †, illustrated articles or notes on a specific plant or subject by ‡, and book reviews by an asterisk (*). Principal subject headings are in boldface type. Many entries have been cross-referenced for ease in locating

them; for example, "Chinese Rhododendrons" under both "Chinese Plants" and "Rhododendrons," and "The Fragrant Garden" under both "Gardens and Gardening" and "Fragrance." If you do not find what you seek under one heading try an alternative.

Two excellent results of this compilation are, first, to show how much valuable material has been published in the pages of the BULLETIN during these years which might easily be overlooked or forgotten if this did not bring it to light, and secondly, the variety of subjects covered and how much or how little material we have available on each. This data will also be of great value to the Editorial Board in the future, in deciding on what articles are needed to bring new knowledge to our readers, as well as to the latter seeking information on some plant group or individual species.

The greater part of the tedious work required in assembling, ordering and checking the index has been done by Miss Gene Webb, Executive Secretary of the Arboretum Foundation; to her the grateful thanks of the Editorial Board, and we hope, in due course, of many members of the Foundation are here expressed for her willingness and patience at such a task.

For those who need them, many (but not all) of the back issues are still available at 50c per copy from the Arboretum Foundation office. Additional copies of this Index may be purchased also for 50c each.
